WORK EXPERIENCE

eDreams ODIGEO

Palma, Spain (Hybrid)

Front End Developer

Apr. 2023 – Oct. 2023

- Contributed to the **development of own products** using **collaborative and management tools** such as **Jira, Confluence, GitLab, Slack, Lucid and Google Meet**.
- Participated in **Kanban methodology** ceremonies, such as dailies, task replenishments, refinements and retrospectives, encouraging **communication, feedback and the continuous improvement of the team**.
- Ensured **code quality** through best practices, implementing **esLint**, tests with **Jest, pair programming** and **code reviews in GitLab**, mainly **TypeScript** code in **React** applications.
- **I played a key role** in the **Front End area** as Prime Keeper, working on **initiatives to increase eDreams Prime user retention**.
- **Guided and accompanied junior profiles** in the resolution of tasks, encouraging their autonomy and ensuring the quality of the work delivered.

Polarier

Palma, Spain

Software Developer

Nov. 2022 – Mar. 2023

- **Led the migration of the main project of management** and control of laundry **operations**, customers and deliveries, providing **a more solid and scalable base**.
- **Redesigned the application** and, together with the technical leader, defined a new **front end architecture based on components** with **React, Redux, Tailwind, Material UI, and Materio TPL**.
- Started the development of the new project using **SVN** for version control, **node.js** for initialization and **webpack** for file optimization.
- **Migrated and optimized more than 30% of the project**, solving **performance and maintenance** issues of the legacy system.
- Discarded unnecessary dependencies, created a **more readable and efficient code structure**, **reduced technical debt** and facilitated future upgrades.
- Also **promoted the use of Agile methods** in the company, introducing **ceremonies and tools** such as **Click Up**.

APSL

Palma, Spain (Hybrid)

Frontend Engineer 2

Jan. 2022 – Aug. 2022

Programadora Junior

Jan. 2021 – Jan. 2022

- Actively participated in **scrum** ceremonies, facilitating **communication, alignment and continuous improvement** by **presenting ideas, solutions and updates**.
- Implemented new features, fixed bugs and made improvements with Full Stack technologies: **Django (Python), Pytest, SQL, Vue, Angular, React, RxJS, JavaScript, TypeScript, HTML, CSS, SASS and LESS, and Tailwind**.

- Progressively focused my work in the Front End area, reaching the **Front End Engineer 2** level in one year.
- Collaborated in a team **doing pair programming, reviewing pull requests (GitLab and Bitbucket) and supporting my colleagues** with tools like **Zulip, Redmine** and **Google Meet**.
- **Took care of code quality** by applying **SOLID** and **TDD principles**.
- Attended **meetings with clients** to discuss and clarify doubts about the projects under development, **ensuring a workflow aligned with their expectations**.
- I was a **speaker in one of the monthly Tech Talks**, contributing to **knowledge sharing in the company**.
- **Mentored new team members**, helping them to understand the structure of the projects, complete their first tasks successfully and adapt to the work environment.

KUMO Consultoría

Palma, Spain (Hybrid)

Programadora

Mar. 2019 – Dec. 2020

- Implemented, corrected and improved functionalities in the **Front End** area using **Angular, LESS, HTML, CSS and JavaScript**.
- Worked in Back End with the MVC **Struts (Java)** framework, managing requests and responses, form validation, XML configuration and the integration of Java (**Servlets, JDBC**) and Front End (**JSP, jQuery, CSS**) technologies; also with **SQL**.
- Performed **server maintenance** tasks and **deployments** with **Apache Tomcat**.
- **Designed and maintained landing pages**, as well as made **updates and improvements** in the company's **back office**.
- Used **collaborative tools** such as **Jira, Trello, GitLab, Slack and Google Workspace**.
- Actively participated in **gile ceremonies** such as dailies, retrospectives and client meetings, fostering an **iterative approach and focused on user needs**.
- **Led** with the CEO the **development of a project with Django (Python) and Vue**, managing from planning to delivery of the **MVP**.
- Demonstrated **adaptability** in remote work and training, **maintaining and even improving my productivity levels in COVID-19 times**.
